

CLEVEREST

Company Profile

OUR NAME

We help you transform your home, business and community by reaching the peak of technological advancement.

ABOUT US

A full-service automation company.

Founded in 2019, Cleverest automates homes, gated communities and commercial spaces across Egypt. We've delivered automated solutions and infrastructure for more than 25 gated communities — including work for Orascom, Tabarak, Al Ahly Sabbour and Katameya Heights — alongside a continuous stream of private villa and apartment installations.

Flexible in tackling challenges and careful with every detail, our team brings the same care to each home and business we automate.

OUR SERVICES

From a single home to an entire compound.

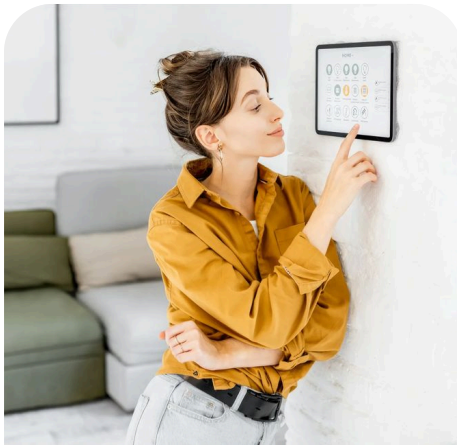

Whatever stage your project is at, we can help you upgrade the property or strengthen the business running inside it.

We join at any stage:

On the drawing board

Mid-construction

Handed over years ago

01

Smart Homes

Security, safety, energy saving, comfort and entertainment for villas and apartments.

02

Gated Communities

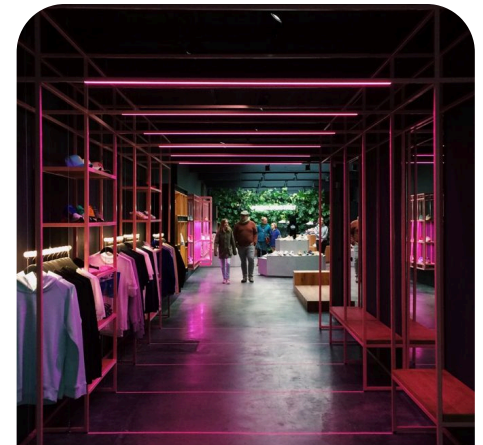

Gates, access control, cameras, fibre, data centres and control rooms.

03

Corporate

Access control, time attendance, networks and IT support for offices.

04

Retail

Cameras, foot-count analytics, POS and sound systems for stores.

GATED COMMUNITIES

From the main gate to the clubhouse.

We build and run the systems a community depends on.

GATE & SECURITY

Barrier gates & licence-plate recognition

Turnstiles, access control & car stickers

Surveillance cameras

Intercom

INFRASTRUCTURE & FACILITIES

Fibre backbone & common-area Wi-Fi

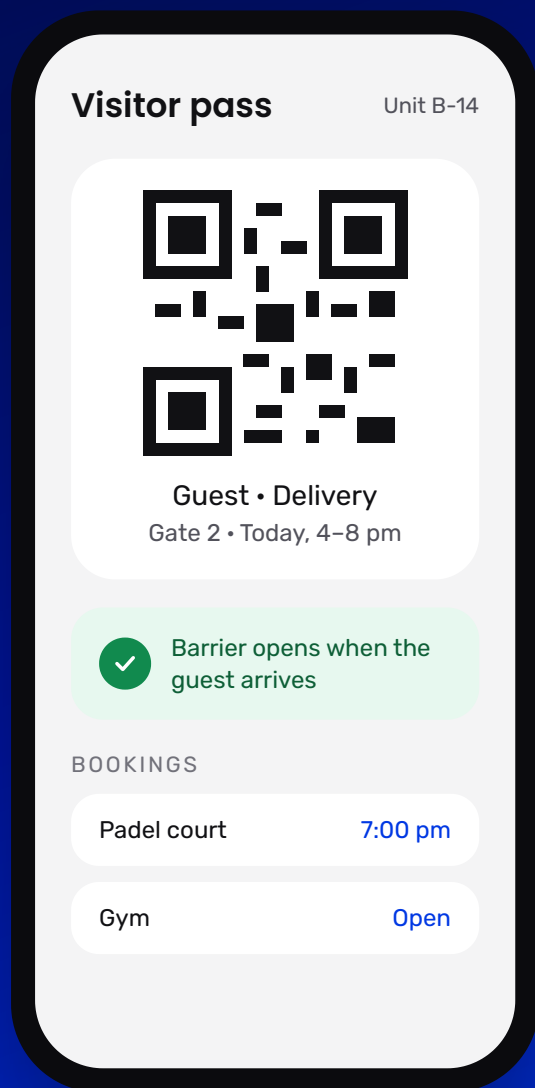

Data centre

Control room

Ongoing support & maintenance

COMMUNITY APP INTEGRATION

The app and the gate, as one system.

We integrate with the platforms your community management already runs, so the hardware and the app behave as one system.

- 01 Residents issue visitor gate passes from the app; the barrier reads them on arrival.
- 02 Resident and unit records stay in sync with access control.
- 03 Time-limited passes for deliveries, contractors and staff.
- 04 Facility bookings open the gym, clubhouse or courts automatically.
- 05 Access and incident logs flow back to community management.

WORKS WITH

Every system a building runs on.

We supply, install and support the hardware behind homes, compounds and businesses.

Barrier gates

Turnstiles

Access control

Surveillance cameras

Intercom

Time attendance

Foot-count cameras

POS

Public sound system

Fire alarm

Environmental Control

Temperature monitoring, water control, irrigation, pool and spa heating, floor heating

Entertainment

Home cinema, multiroom audio, surround sound, outdoor speakers, video distribution

Interactions

Voice control, mobile app, smart watch app, touch panels, universal remote, remote access

Technology that serves the way you live and work.

Our mission

We aim to provide innovative and integrated solutions that help our clients realise their dream lifestyle or maximise their business value.

Our vision

For us, automation isn't a gadget. It's how a home feels to live in and how a community runs — a future being built today, not promised.

Our strategy

Every day, our team works through four steps to find you the optimum solution.

- 1 Listen
- 2 Consult
- 3 Evaluate
- 4 Find the optimum solution

How we work

Four steps, one team, from the first visit to support long after installation.

01

Consult

We visit your space and learn how you live or work.

02

Design

A tailored system and scenarios planned around your needs.

03

Install

Our team installs, configures and tests everything.

04

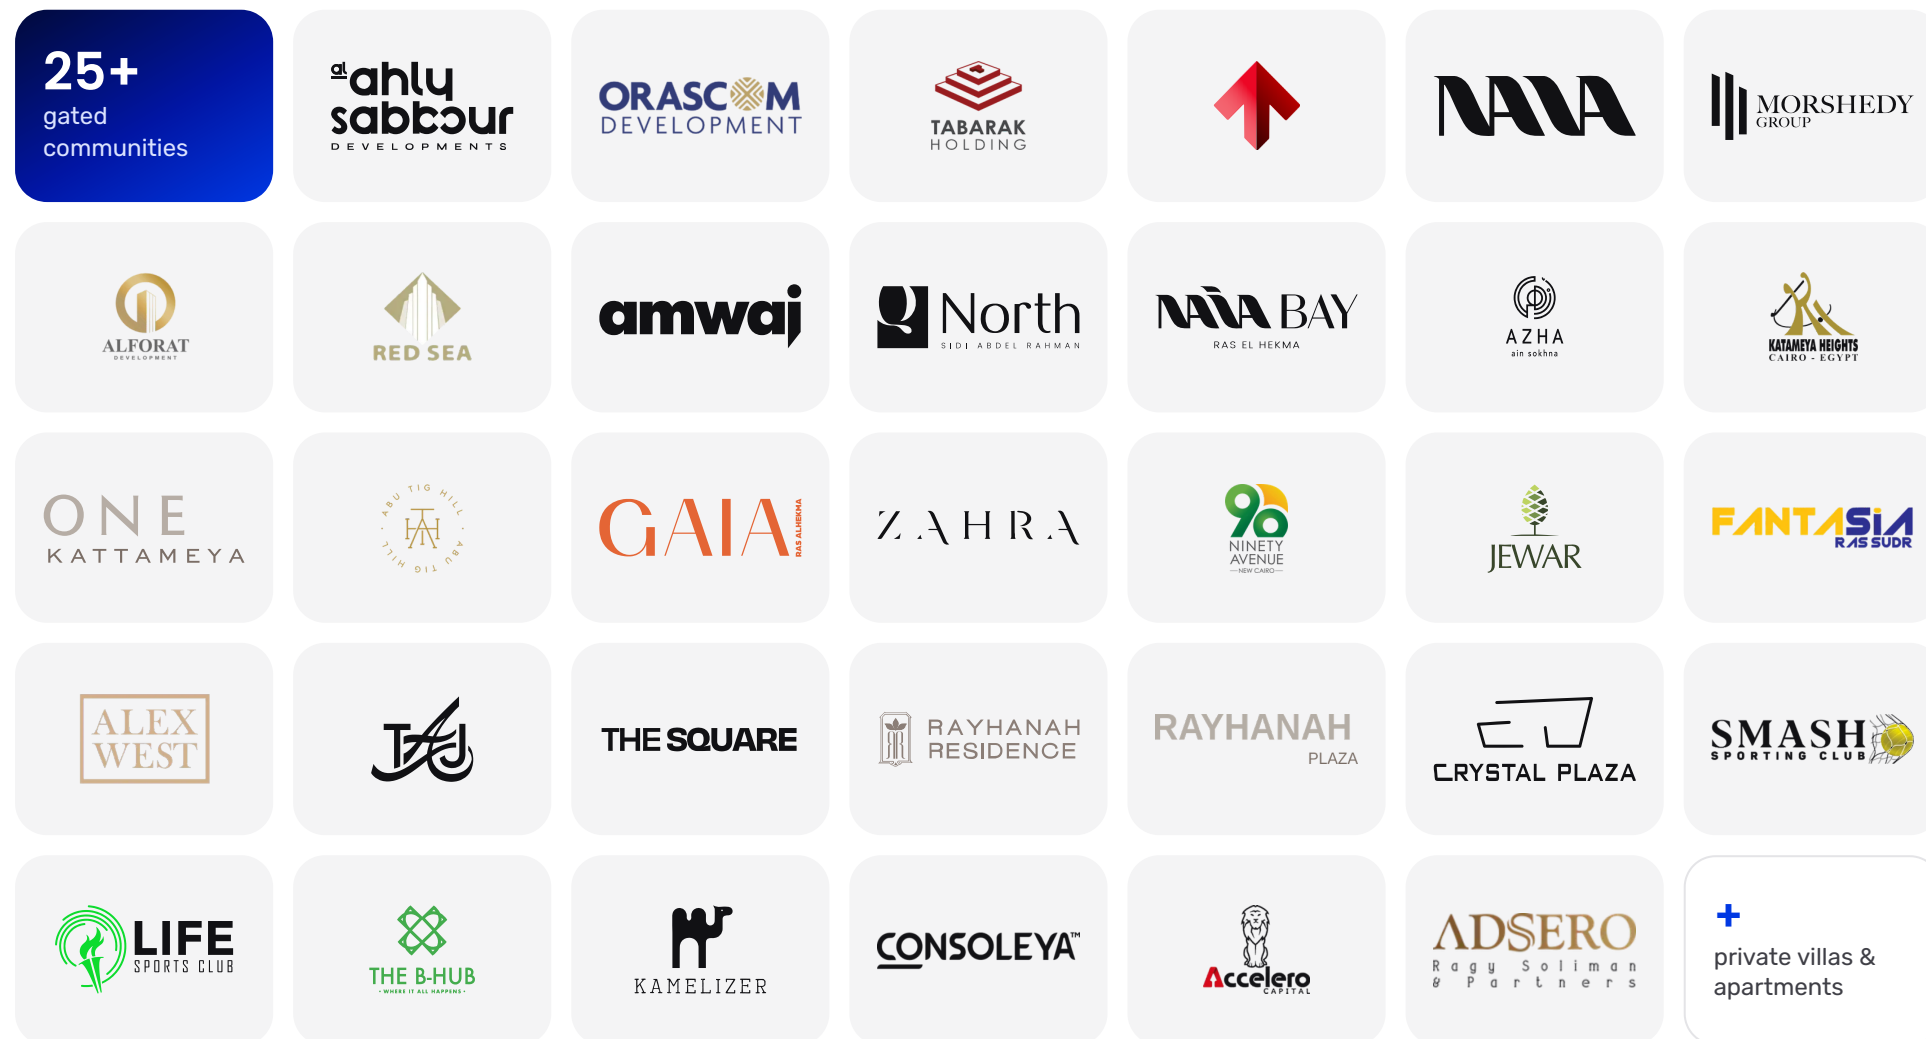

Support

We stay on hand for updates, changes and service.

OUR CLIENTS

Trusted by Egypt's leading developers.

The communities, clubs and businesses where our systems run every day.

OUR VENDORS

Technology partners we install and support.

Trusted brands for security, automation, networking and power.
